OVERVIEW:

A motivated full stack developer proficient in HTML, CSS, JavaScript, and Python. Providing a highly accurate quality of projects using strong problems solving skills in the office or remotely. An agile, resilient, and self-directed professional. Making a career change due to wanting a career that is progressive, testing, and fulfilling. Currently looking for new opportunities within a reputable company to match my desire to progress into a development career.

EDUCATION:

Udemy React front to back, Remotely – November 2020 – present

- Learning React fundamentals such as components, props, states, and hooks

Code Institute, Remotely – June 2019 – June 2020

- Code Institute Full Stack Diploma in Software in Development accredited by Napier Edinburgh university

St Olcans High School, Randalstown – Sept 2001 – June 2006

- GCSEs: A-C in Seven subjects including Maths, English and Double Award Science

SKILLS:

- Frontend & backend languages: HTML, CSS, JavaScript, Python
- Frameworks and library: Bootstrap, Flask, Django
- API's and databases: GoogleMaps, emailJS, Stripe, SQL, SQLite, TravisCI and MongoDB
- Hosting services and testing: Github, AWS, and Travis CI
- Social Media and Networking
- customer service, leadership, and the ability to perform under pressure

PROJECT EXPERIENCE:

- **One for The Road** - A full-stack site website based around business logic used to control a centrally-owned dataset. An e-commerce webpage selling craft beer. Built with HTML, CSS, JavaScript, Django, PostgreSQL, Stripe, and Heroku

- **Pound for pound** - A full-stack site website that allows users to manage a common dataset about a particular domain. Designed using HTML, CSS JavaScript, Git, Bootstrap, Flask, MongoDB Python, and Heroku
- **Pawcation** - A interactive front-end site that allows potential users to interact with the site and search the map for places to stay that are dog friendly. Developed with HTML, CSS JavaScript, Git, Bootstrap, google maps API and emailJS
- **Django Blog** - A simple blog app written using Django. Designed using HTML, CSS JavaScript, Git, Bootstrap, Django, PostgreSQL Python, and Heroku

WORK EXPERIENCE:

Northern Ireland Civil Service (Executive Officer – work coach)

August 2018 – present

- Prepared claimants to take action for getting themselves into employment, sustaining employment, and developing their career
- Facilitated training for my claimants to help use digital job search methods i.e., job search websites, email, uploading documents, social media
- Responsible for identifying the range of provisions available and referring claimants appropriately to relevant supportive provision and institutions
- Collaborated other team members and management when dealing with a difficult claimant or task
- Manage a caseload in excess of 300 claimants in one of the most trying regions in Northern Ireland with due diligence

Northern Ireland Civil Service (administrative officer- Child Maintenance Service)

April 2007 – August 2018

- Creating draft guidance for overpayments on old cases to allow colleagues to correct system bugs with financial payments. This was then put into official use throughout all CMS offices.
- Training and consolidation of new team members into the service on inhouse systems to allow them to create, read, update a delete a claimant's case during the lifespan of the case.
- Adhere to policy, law, and guidance within CMS as well as customer confidentiality in line with GDPR to maintain over 95% on all compliance checks
- Assessing and responding to difficult complaints efficiently resulting in a yearly low of less than 1% of complaints going over 30 days across the uk offices.

INTERESTS:

In my free time, I enjoy learning further languages/ frameworks and using them to build websites and apps to improve my skills. Also, a regular gym-goer and watcher of most sports. My biggest interest is my dog and taking her for long walks at the local park.
